

EDUCATE. COLLABORATE. PREVENT INFECTIONS.

Kentucky Infection Prevention (KyIP) Training Center provides education and training to all health care professionals, including nurses, infection preventionists, providers, pharmacists, allied health professionals, front-line workers, first responders and paramedics, along with anyone interested in the areas of infection prevention and control across Kentucky. KyIP Training Center represents a unique and broad array of specialists with expertise in the fields of infection prevention and control, and infectious diseases.

We understand the unique infection prevention and control challenges faced by EMTs and fire professionals, and we've built our trainings to close those gaps. KyIP Training Center delivers mobile, on site education — bringing instructional expertise directly to your team.

Emergency medical services (EMS) and fire-specific education includes:

Didactic

- Offered live or recorded

Hands-on simulations

- Simulations focused on key infection prevention and control activities for EMS and fire personnel

Train the trainer

- All didactic content and simulations available to train the trainer

Duration of training is tailored to your agencies' needs

Connect with our team

KyIP Training Center is committed to supporting EMS and fire personnel at every experience level — from seasoned responders looking to deepen their infection prevention and control expertise to newcomers building a strong foundation. Our inclusive, field-focused approach ensures meaningful learning for all who work to protect Kentucky's communities.

All services are provided at no cost!
